INTRODUCTION

Purpose

The purpose of this manual is to establish guidelines for Department of Procurement Management (DPM) staff regarding the preparation for and recovery from hurricanes. While the primary emphasis has been placed on hurricanes, these guidelines may be modified to accommodate any declared emergency as deemed in the best interest of Miami-Dade County (MDC).

DPM plays a critical role in the County's hurricane preparedness and recovery efforts. Consequently, DPM staff should become familiar with and adhere to hurricane procedures to help to ensure adequate protection of County facilities, personnel and property, as well as to mitigate losses and facilitate speedy recovery.

The Miami-Dade County Manager will make hurricane emergency decisions and official orders will be disseminated through regular employee communication channels, the broadcast media and if necessary, by telephone and through department directors. The County will operate on emergency work schedules based on the following general announcements by the County Manager.

- Closure of Miami-Dade County offices
- Activation of the Emergency Operations Center (EOC)
- Ordering Miami-Dade County employees with recovery responsibilities back to work
- Ordering all Miami-Dade County employees to return to work

Responsibilities

Every DPM employee has a responsibility to understand and comply with their obligations and duties related to hurricane emergency procedures. It is the responsibility of each Division Director and each Division Manager to ensure that reporting requirements are clear and that all divisional employees are appropriately assigned prior to and after a hurricane.

Thomas Blaine, Technical Services Division Director is the DPM Disaster Preparedness Liaison. He can be reached at the following numbers:

Work Number: (305) 375 - 5375

Cell Number: (786) 473 - 9111

EMERGENCY HURRICANE PROCEDURES

Pre-Season Preparedness

DPM shall complete the following preparations before the onset of Hurricane Season each year:

- Update Emergency Contact list by May 1: DPM maintains an emergency contact list of all employees, including telephone numbers, beepers, and cellular telephone numbers. The list will be updated before and during the hurricane season as necessary beginning May 1 of each year and will be used by the Miami-Dade County Manager's Office and DPM Managers to contact employees.
- Review hurricane procedures with staff prior to June 1st
- Procure DPM hurricane supplies
- Review Hurricane Purchasing Policies and Procedures
- Distribute DPM Hurricane Manual to DPM staff prior to June 1
- Compile list of contracts for hurricane preparedness and emergency supplies and confirm their ability and willingness to provide hurricane supplies

Pre Storm Activity and Recovery

The Department of Procurement Management has significant responsibilities in both pre-storm preparations and post-storm recovery efforts. DPM employees will be made aware of their hurricane preparedness duties as well as recovery assignments for Emergency Operations Center assignments and staffing.

Communications, where possible, will follow the chain of command from the Miami-Dade County Manager through the Department Director to DPM staff. Each division will establish designated lines of communication and alternate operational and communications procedures should normal communication be impossible.

Pre Storm Procedures:

1. Hurricane Watch (24-36 hours before storm landing)

- If a Hurricane Watch is announced during working hours, all Department employees must take appropriate steps to protect their assigned DPM furniture, equipment, records, and other valuables. All documents should be put in file cabinets or desks, away from windows. Designated equipment should be wrapped in plastic covering for protection against moisture.
- Electrical equipment should be disconnected and all lights turned off, with the exception of lights on emergency circuits and desktop computers required for remote access. All file cabinets should be locked.
- Employees are responsible for removing personal items from County premises as Miami-Dade County is not responsible for any loss or damage to personal items left on County property.

- Employees assigned to the Emergency Operations Center as identified in the DPM Master Schedule for EOC Support (Attachment A) will be given ample time to prepare their personal property before reporting to duty.
- If a Hurricane Watch is announced during non-working hours, all DPM personnel not on leave of absence, must contact their supervisors as soon as possible after the announcement. If unable to contact their immediate supervisor, personnel must contact any other DPM supervisor to confirm emergency and working arrangements.

2. Hurricane Warning (*24 hours before storm landing*)

- Supervisors should make sure all preparations are complete before releasing DPM employees.
- Employees are responsible for keeping abreast of media and weather service reports on the hurricane's progress and any post-hurricane instructions, especially instructions for reporting to work.
- It is the responsibility of all DPM employees to notify his or her immediate supervisor of any change of address or telephone number to ensure all staff can be reached.
- Except as designated by the DPM Director, DPM employees will not work normal duties during this phase. Department Essential staff assigned to the EOC will report as scheduled.

3. Dismissal of County Employees

The County Manager will announce when Miami-Dade County offices should close and when non-essential employees are dismissed. Employees with hurricane watch responsibilities may be released after preparations are completed.

Post Storm - Recovery

4. Recovery

The Department of Procurement Management (DPM) has assigned employees as Emergency Operations Center (EOC) Essential or Departmental Essential. EOC Essential employees will be assigned temporary special disaster work in the Disaster Assistance Employee (DAE) Program. Departmental Essential employees will be assigned purchasing functions either at the EOC or DPM Command Center in the Stephen P. Clark Center (SPCC) or alternate location if the SPCC is unavailable.

Both the EOC and DPM Command Center will be staffed. After the hurricane has passed, the County Manager will typically order County employees with recovery responsibilities to return to work first. All Department Essential recovery employees, as identified by Division Directors, should report as soon as possible following the hurricane.

Employees assigned recovery tasks and who are unable to report to work, must communicate their status to their supervisor. All other employees will return to work when instructed to do so by appropriate departmental personnel or upon the County Manager's orders that all employees report to work.

5. Return to Work

As soon as possible following the hurricane, all DPM employees will report for duty as directed by the County Manager, DPM Director or his/her designee. Senior management staff shall also report to the DPM Director for specific instructions. DPM employees are to report to the Stephen P. Clark Center unless instructed otherwise. DPM employees assigned to the Disaster Assistance Employee (DAE) Program will report to designated assignments given by the Office of Emergency Management, when instructed. Employees are required to notify their supervisor daily of their assignment, location and hours worked. Additionally, Daily Activity Reports must be completed.

Employees should contact their supervisor when unsure of their assignment or the appropriate action. If the supervisor cannot be reached, employees can contact the DPM Command Center at (305) 375-5548 or (305) 375-4439 for direction.

Alternate Locations for DPM Staff (*After the Hurricane*)

Employees are to return to work as instructed by County officials as soon as possible. In the event that the Stephen P. Clark Center not be accessible or be uninhabitable, the DPM director will instruct staff on alternate reporting locations.

Alternate locations, as noted on page 1, will be used if the Department of Procurement Management is unable to work at the Stephen P. Clark Center. Before reporting to any alternate location, employees must first contact their immediate supervisor or other DPM Manager to verify their reporting location. EOC procedures will be followed until the emergency is over.

DPM STAFFING ASSIGNMENTS AND RESPONSIBILITIES

Effective January 2006 all Miami-Dade County employees will be designated Essential Employees under one of two designations – Emergency Operations Center (EOC) Essential or Department Essential thereby rendering assistance during and after a disaster. The DPM staffing policy will be consistent with Miami-Dade County policy. Whenever practical DPM Management will consider employees' personal obligations (i.e., the impact of the storm on individuals, residences, etc.) when making hurricane staffing assignments. However, in the event that a hurricane makes landfall, all vacation leave will be cancelled immediately and employees should make arrangements to report for work as directed.

Unless instructed otherwise, all DPM employees are required to complete Daily Activity Reports.

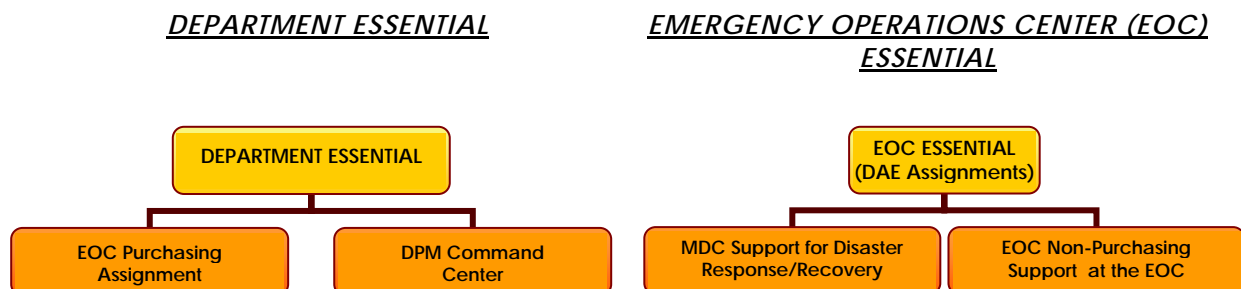

Department Essential Employees

Employees designated as Department Essential will be assigned procurement related hurricane work either at the Emergency Operations Center (EOC) or at the DPM Command Center. The DPM Command Center will be located at the Stephen P. Clark Center (SPCC) or an alternate location if the SPCC is not available.

EOC Essential under the Disaster Assistance Employee (DAE) Program

The Office of Emergency Management (OEM) Disaster Assistance Employee (DAE) Program was designed to identify County personnel to adequately meet the staffing needs of disaster response and recovery programs. Employees designated with DAE Assignments are considered Emergency Operations Center (EOC) Essential. EOC Essential Employees will be assigned non-procurement hurricane related work either at the EOC or throughout the community.

All employees with DAE Assignments are required to choose a disaster work assignment prior to July 1st and enter that information in the Miami-Dade County Bluebook at <http://intra.miamidade.gov/bluebook/>. Generally, employees designated with DAE Assignments are pre-identified for a specific assignment and training is provided prior to the emergency. Depending on the nature and intensity of the disaster, however, employees may receive assignments with little notice. In this case, the EOC utilizes the Blue Book to search for County personnel who can appropriately fulfill these disaster needs. Employees with DAE Assignments who are not called to report to an assignment must also report to the DPM Command Center. Refer to Attachment D for the DAE Program Work Descriptions.

Department Essential Assignments At the Emergency Operations Center (EOC)

The Office of Emergency Management (OEM) is a division of the Miami-Dade Fire-Rescue Department. The OEM's principal function is to lessen the impact of disasters by meeting the needs of the community through planning and coordination of information and resources.

The Department of Procurement Management (DPM) has been designated the lead department for procurement in Miami-Dade County's Comprehensive Emergency Management Plan (CEMP). This function falls within the EOC's Logistics Section and is established to ensure that needs are prioritized and resources can be located, secured, distributed and utilized in the most effective manner. The procurement function is organized within the EOC's Administration. The DPM Master Schedule for EOC Support is included as Attachment A. The EOC location and contact information is included on page 1. DPM staff assigned to the EOC will receive support from the DPM Command Center in accomplishing required tasks.

Levels of Activation / Work Shifts

The EOC has established four levels of activation concerning emergency situations, including hurricanes. Refer to Attachment C for details regarding Levels of Activation. Generally, DPM is expected to begin staffing the *assigned seat at the EOC upon notice* after Level 2 activation is announced or as required by the County Manager's Office. As a lead agency at the EOC, DPM will receive all notices relative to the emergency while the hurricane is being tracked following EOC activation, typically after Level 2. Staff assigned to report to the EOC should anticipate remaining at the EOC facility until the hurricane has passed and the "ALL CLEAR" has been announced.

Staff assigned to the EOC will be required to work shifts from four to twelve hours (dependant upon the nature of the emergency). The EOC will determine the duration of each work shift. The first shift will start at the time of emergency activation. The DPM Director will notify the first shift to report to the EOC upon emergency activation. The Team Leader assigned to the EOC is responsible for notifying the next group in line to be available to provide coverage. Team Leaders are also responsible for contacting team members and assigning substitutes as needed.

All personnel assigned to work at the EOC should report to the Security Station to sign in and exchange personal IDs for an EOC access badge related for the functional section to which individual staff is assigned. Staff assigned to the EOC during this period may wish to bring personal hygiene items, personal comfort items, and snacks. The EOC will endeavor to provide meals. However, employees are encouraged to bring their own meals as a back-up. Family members are not permitted at the EOC, a County ID must be presented to gain access to the Center and employees will be required to sign in and out of the Center. Assigned staff that is unable to report due to their personal situation must immediately convey this information to the Team Leader. If the Team Leader is not available, the employee's supervisor, manager or division director must be contacted.

After the hurricane has passed, shift rotations will continue *as indicated in Attachment A* and employees who staffed the EOC during the hurricane will be relieved as soon as it is safe.

DPM Role and Responsibility

During an EOC activation, DPM's role as the lead agency for procurement of goods and services is to receive, evaluate and act on resource requests from County departments. DPM may also identify suppliers and vendors for municipalities and other outside agencies who are unable to locate and secure them on their own. In the procurement of goods and services, DPM staff must also follow these guidelines:

1. Absolutely no orders are to be placed without approval by the DPM Team Leader and an authorized representative from the user department.
2. Team Leaders and authorized representatives from user departments must be identified by name in the designated logs where purchases are documented.
3. DPM staff is not authorized to place orders on behalf of municipalities, other outside agencies or private facilities/entities.

DPM services may include, but is not limited to, procuring goods or services through local vendors, securing items through existing County inventories, or acquisitions through the State of Florida Mutual Aid agreement network. DPM, in conjunction with the EOC Logistics Section Manager, will also be responsible for the overall coordination of storage, transportation and distribution of those resources in conjunction with many other counties and outside agencies performing these activities. DPM continues to compile a list of contracts for Hurricane Preparedness and Emergency Suppliers for a wide variety of goods and services. The lists are included as Attachment B.

Department Essential Assignments At the DPM Command Center

The Department of Procurement Management (DPM) operates a Command Center as a focal point for all hurricane activities carried out by DPM. The DPM Command Center will be located on the 13th floor of the Stephen P. Clark Center and may be reached at (305) 375-5548 or at (305) 375-4439. In the event that the Stephen P. Clark Center is not be accessible, the DPM director will instruct staff to report to alternate locations as noted on page 1.

The DPM Command Center will be fully operational only after an "ALL CLEAR" advisory has been issued by the County Manager. All Department Essential employees not assigned to the Emergency Operations Center shall report to the DPM Command Center. Employees with DAE Assignments who are not called to report to an assignment must also report to the DPM Command Center. It is the responsibility of DPM employees to notify their immediate supervisor if they are unable to respond.

Employees who are unable to respond because of injuries to self or family, damage to property, travel restrictions, or any other legitimate circumstance that would prohibit the employee from responding and performing assigned duties should inform their supervisors immediately. Miriam Singer, DPM Director, or designee will direct the DPM Command Center and issue emergency response assignments to staff and coordinate all emergency response activities.

PURCHASING POLICIES AND PROCEDURES FOR MIAMI-DADE COUNTY DEPARTMENTS DURING AND AFTER A DISASTER

During the emergency, when a department needs to purchase goods or services, the department will follow the procedures listed below:

1. Small Purchase Orders (SPOs)

If the purchase is \$10,000 or less and is not available on a County Contract, the department will get quotes where possible and issue a small purchase order. Departments issuing a small purchase order must comply with standard procedures as outlined in Administrative Order O3-38 and DPM Procurement Guidelines. The department will enter the purchase into the Advanced Purchasing and Inventory Control System (ADPICS) SPO screen PCHL 2360 using the designated emergency "DE" Identifier. Departments must be able to track hurricane purchases for hurricane reimbursement. If ADPICS is not available, departments are to issue emergency purchase order numbers as noted in 4 below.

2. Accessing County Contracts

DPM has established new contracts and modified existing contracts to ensure that County departments have access to appropriate allocations needed for continuity of operations. These contracts are listed in Attachments B. Releases shall be created on screen PCHL 2360 which will be designated with the emergency "DE" Identifier. The Department should contact the Department of Procurement Management in order to request allocations on any contract.

3. Purchasing Cards (P-Cards)

Departments may use P-cards to effect emergency-related purchases. Departments using P-Cards must adhere to all County rules and regulations concerning the use of P-cards. The departments must file the appropriate documentation for future audits.

4. Emergency Purchase Order Numbers (For purchases greater than \$10,000)

When a disaster occurs, Departments may be given a limited number of emergency disaster purchase order numbers. In cases where Emergency Purchase Orders are used, the using department must enter the purchase in Advanced Purchasing and Inventory Control System (ADPICS) Requisition screen number PCHL2100 using the designated emergency (DE) purchase order number provided. The using department must ensure that the name of the disaster is included. This (DE) designation must be included on the Specification section of the (ADPICS) requisition screen as this designation is used to facilitate filing of disaster relief claims from State and Federal sources after the disaster.

All emergency purchase orders must be certified by the Department Director or Designee. This certification must be included with the Emergency Input Document which the department forwards to DPM subsequent to the issuance of the emergency purchase order.

To facilitate the reimbursement of hurricane related purchases, the following information must be included in the specification section of the requisition:

- Date of Purchase
- Type of Disaster (e.g. Hurricane)
- Name of Disaster (e.g. Wilma)
- Location of Delivery
- Person authorizing the purchase
- Title of person authorizing purchase
- Emergency Purchase Order No.

MIAIMI-DADE COUNTY EMERGENCY PREPAREDNESS PLANS AND TRAINING

It is the responsibility of each Division Director and/or manager to ensure that all employees in their division receive training on the implementation of their respective Division's Hurricane Emergency Procedures. It is essential that all employees understand their obligations before, during and after a hurricane. In addition to being familiar with the DPM Hurricane Manual and procedures, DPM staff must also be made aware of other emergency preparedness plans and required training. The National Incident Management System (NIMS) and Continuity of Operations Plan (COOP) are two required mandates for county departments. They are described below.

National Incident Management System (NIMS) / Incident Command System (ICS)

The National Incident Management System (NIMS) is the United States' first standardized incident management system. The system provides a consistent nationwide approach for Federal, State, and local governments to work effectively and efficiently together to improve incident response, emergency preparedness, community preparedness, and communication. Beginning this fiscal year, departments and agencies wishing to receive FY 2005 federal preparedness grants must be NIMS compliant.

All staff assigned to the Emergency Operations Center (EOC) during activation must complete the following NIMS courses:

1. IS 700: NIMS, An Introduction
2. IS 100.FW: Introduction to the Incident Command System, I-100, for Federal Disaster Workers
3. IS 200.FW: Basic Incident Command System, I-200, for Federal Disaster Workers

The required courses are online at: <http://training.fema.gov/EMIWeb/IS/crslist.asp>. Refer to Attachment E for a full description of the NIMS.

Continuity of Operations Plan (COOP)

In accordance with Ordinance 8B - Emergency Management, all Miami-Dade County departments, authorities, independent agencies, and constitutional officers must prepare and annually review and revise emergency contingency plans pursuant to directions and guidelines from the Office of Emergency Management.

The Continuity of Operations Plan (COOP) is a county-wide initiative implemented within individual departments and agencies to ensure continued performance of minimal essential functions during a wide range of potential emergencies. This is accomplished through the development of plans, comprehensive procedures and provisions for alternate facilities, personnel, physical property, resources, interoperable communications and vital records/databases. The DPM COOP Plan is submitted each year to the Office of Emergency Management as part of the County's Emergency Preparedness Plan.

CONTRACTS AND SUPPLIERS FOR HURRICANE PREPAREDNESS

The Department of Procurement Management has established new contracts and modified existing contracts to ensure that County departments have access to appropriate allocations needed for continuity of operations during the emergency and recovery periods. Additionally, suppliers have been contacted and have indicated that in the event of a hurricane, they will remain open as late as practical before a hurricane and will re-open as soon as possible after a hurricane.

The list of "Contracts for Hurricane Preparedness" is included below. The "Contracts for Hurricane Preparedness" references specific tables containing suppliers for the various hurricane contracts. Suppliers listed in the tables will supply hurricane related items such as: fuel, plywood, general lumber, hardware (nuts, bolts, anchors, etc.), batteries, flashlights, duct tape, masking tape, water, ice, groceries and frozen foods as well as catering services.

In case of a Hurricane Watch, departments should not expect deliveries from these companies and therefore departments should plan ahead and be ready to pick-up the materials required. These vendors will accept regular, verbal, or emergency purchase orders.

Contracts for Hurricane Preparedness

CONTRACT NO.	CONTRACT TITLE	DESCRIPTION	REFERENCE TABLE ATTACHED
*05091 RFP	Building Materials (Disaster Use only)	Building Materials	1
CBWM7757-0/06	Building Materials	Roofing materials/lumber/ Plywood/cement (bagged)/ Plaster/sheetrock/hardware/ doors(wood)/plumbing/batteries, flashlights, duct tape, masking tape etc.	1

Note:

When winds reach approximately 30 miles per hour, it is extremely difficult to handle lumber and especially plywood, whether carried by hand or transported on open vehicles.

Departments are to issue a request for quote referencing the bid number and the User Access Program (UAP) requirement. A reply should be expected within 24 hours. This allows for the bidder to visit the site to estimate the job.

Prices must include the disposal fee at the landfill. Depending on the job, prices should be requested for the cutting of trees, loading, hauling (by cubic yard or per ton) and the landfill fee.

*Office of Emergency Management(OEM)
Emergency Operations Center(EOC)*

Primary risks to Miami-Dade County and its over 2.3 million residents include hurricane, tropical weather, tornados, standing water flooding, radioactive incident, mass immigration, transportation mishaps and civil unrest.

Programs implemented by the Office of Emergency Management (OEM) include Activation of County Emergency Operations Center, Anti-terrorism, Community Preparedness Program, Community Emergency Response Team (CERT), Emergency Evacuation Assistance Program, Local Mitigation Strategy, Medical Response Team, Radiological Emergency Planning (REP), Residential Health Care Facilities Program, The Answer Center, and Training and Exercises.

Major Response and Recovery Partners working in conjunction with the O.E.M. include 34 municipal emergency management departments, police and fire departments, Volunteer Organizations Active in Disaster (VOAD). VOAD includes the American Red Cross, Salvation Army, the United Way and 30 Miami-Dade County Departments. Additional support for this effort is provided by the Agency for Health Care Administration, Florida Division of Emergency Management, Florida Department of Law Enforcement, Florida Highway Patrol, Division of Forestry, Florida National Guard, the Federal Emergency Management Agency, and the Department of the Interior including Biscayne National Park and the Nuclear Regulatory Agency. Utilities participating in this operation include FPL, TECO Energy/Peoples Gas, Bell South, and Bell South Mobile.

The Miami-Dade County Emergency Operations Center (EOC) is located within the Miami-Dade Fire-Rescue Headquarters facility at 9300 NW 41 Street, Miami, Florida. The EOC is a 22,000 square foot complex that houses computerized work stations, advanced electronic information displays, advanced telecommunications, conference rooms, a media center with production capability, a radio communications room, direct audio and video feeds, closed circuit TV, a call center with hearing impaired telephony, and media monitoring stations. The EOC also houses food service areas, and dormitories with accommodation for over 150 people at full staffing.

**Levels of
Emergency Operations Center (EOC) Activation**

The various activation levels that trigger operations at the EOC are described below.

Level 1:

The OEM monitors incidents or events that have the potential to develop into disaster situations within Miami-Dade County. Level 1 activation will not require the OEM to alter its day-to-day operations or management structure. Events or incidents that occur during a Level 1 state of readiness can generally be resolved quickly by using a very small number of resources.

Level 2:

The purpose of a Level 2 activation is to initiate preparations due to a significant threat of a disaster or to coordinate response due to the occurrence of a minor disaster. DPM typically activates any time after level 2 is announced or as required by the County Manager.

Level 3:

Level 3 activation is full mobilization of the EOC during which the EOC is fully functional 24-hours/day. Primary and support personnel for all Incident Command Systems (ICS) positions, (i.e., command, operations, planning, administration/finance, and logistics) are activated.

Level 4:

This stage is a full mobilization of the EOC designed to meet the needs created by a major catastrophic disaster, which go beyond the resources of the local or even State response capabilities. Response, relief and recovery operations are expected to last for an extended period. The EOC will be staffed as in Level 3 with the possibility that additional support or back-up staff may be needed.

Disaster Assistance Employee (DAE) Program

The Office of Emergency Management (O.E.M.) has created several programs to lessen the impact of disaster to the community and enhance the County's response. One such program, the Disaster Assistance Employee (DAE) program is designed to identify County personnel to adequately meet the staffing needs of disaster response and recovery programs. Miami-Dade County employees will be paid by their employing agencies while working in disaster assistance programs. OEM will schedule the requisite training and orientation for staff to participate in these programs.

Disaster assistance assignments include providing support for the Special Needs Evacuation Centers (SNECs), EOC Special Needs Phone Operators, Miami-Dade County EOC Support Staff, Message Tracking and Mission Control (MTMC), Disaster Information and Referral Centers (DIRC), Neighborhood Emergency Assessment Teams (NEATs) and Volunteers.

Disaster Assistance Employee (DAE) Program Disaster Work Descriptions for EOC Essential County Personnel

Residential Shuttering Program: *Shuttering Team*

Teams of two will visit the homes of clients of the Residential Shuttering Program. Clients are low-income, elderly residents or residents with disabilities who have received free shutters from the County's program. When a storm is approaching, DAEs will install the hurricane panels on clients' homes. This is light labor that takes place outdoors and does not require any climbing or knowledge about tools. The panels are light weight. This assignment often begins several days before the storm's landfall and teams are usually assigned 4-5 houses relatively close to each other. At this time, you must provide your own transportation.

Shelter Management: *Shelter Mngmt/Support Staff*

DAEs will serve as staff in the special needs evacuation centers (SNECs), in the pet-friendly evacuation centers (PHEC), as County liaisons and back-up staff in the Red Cross managed general population evacuation centers (HECs), and as liaisons and back-up staff in post-disaster shelters. These are typically 12 hour shifts (longer if a storm is hitting), day and night. This is a light labor job that takes place indoors. Strong organization and communication skills are necessary. Multiple languages are a plus.

EOC Support: *EOC/Admin Staff*

Limited positions are available within the Emergency Operations Center (EOC). The atmosphere may become very fast-paced and require multi-tasking. This work is indoors, 12 hours shifts, day and night, any time the EOC is activated (before, during, and after an emergency). Positions range from document runners to advanced administrative, management work. The most important characteristic is a strong desire to support the work of the EOC. Office and computer skills are necessary.

Call Centers: *Phone Operators*

There are many possible needs for callers, such as call-downs for evacuations and for the DAE program, to augment staff at the volunteers and donations hotline, and others. Clear voices and multiple languages are helpful. This work is not manual-labor intensive.

Distribution Points and Staging Areas: *Post-Disaster Fieldwork*

This work is usually outdoors and in all weather. Teams will consist of DAEs engaging in both heavier and lighter work, so those interested in field work can all be placed at these sites. Heavier work includes loading supplies into residents' cars, off-loading trucks and pallets, and moving equipment and boxes. Lighter work includes forklift drivers, inventory controllers, community relations people, and car counters that are also critical to these sites.

Warehouse Staff:

After a disaster, donations drives often take place. DAEs are needed to work in the warehouses that receive the donations. They will sort, box, label, and load. Also, supplies may be prepositioned prior to a storm. Some lifting is required.

Traffic Direction:

When Miami-Dade County experiences power outages, it may be necessary to augment traffic control staff. Pre-identified DAEs will receive a 6-8 hour training course through MDPD to become certified and then will be dispatched to various intersections. This work will take place outdoors in all weather. DAEs interested in these posts should be able to react quickly and multi-task.

Debris Monitors:

When debris clearance is necessary, the County may need to provide monitors. DAEs in these positions must be able to work long hours outdoors, must be attentive, and detail-oriented. This work is not labor intensive, but may last for some time after the emergency.

Disaster Assistance Centers (DACs): *DIRCs (Disaster Information Recovery Centers)*

Post-disaster, DACs may be open to offer information to affected residents about how and where to find services. DAEs will be needed to help with direction and control, answering questions, and assisting residents. This work may be indoors or outdoors and is often not labor intensive.

Volunteer Reception Centers (VRCs):

During large disasters, when spontaneous volunteers arrive on site despite pleas to the contrary, VRCs may be open to receive and place them. United Way/Hands on Miami is the lead for these centers, but DAEs may be needed to augment staffing. This work may be indoors or outdoors and is often not labor intensive.

For additional information, please visit www.miamidade.gov and follow the link on the Office of Emergency Management (OEM) webpage to the Disaster Assistance Employees (DAE) Program.

National Incident Management System (NIMS) / Incident Command System (ICS)

NIMS is a system mandated by Homeland Security Presidential Directive – 5 (HSPD-5) that provides a consistent nationwide approach for Federal, State, local and tribal governments; the private sector and non governmental organizations (NGOs) to work effectively and efficiently together to prepare for, respond to and recover from domestic incidents, regardless of cause, size or complexity.

The management model followed by the Miami-Dade Emergency Operations Center (EOC) is based on the principles of the Incident Command System (ICS). The ICS model has been recognized as the model for the command, control and coordination of resources and personnel in response to an emergency. The ICS is designed to enable effective and efficient incident management by integrating the use of facilities, equipment, personnel, procedures and communications operating within a common organizational structure. The ICS management is structured to facilitate activities in five major functional areas: command, operations, planning, logistics and finance and administration.

The management model is used in the CEMP to organize both short term and long term operations for a broad spectrum of emergencies, from small to complex incidents, natural and manmade. It is used by all levels of government federal, state, local and tribal, as well as many private and non governmental organizations. Using ICS, multiple agencies and jurisdictions work together to accomplish the required response and recovery activities dictated by a disaster. These tasks are performed under the overall direction of the Incident Manager (i.e., the County Manager or designee). All participating agencies and jurisdictions will contribute to the determination of the incident objectives and strategy via the incident action plan, and the optimal utilization of all available resources in an integrated manner. This flexible management method allows expansion or contraction of response and recovery forces as dictated by the magnitude of the event.

The NIMS/ICS principles have been incorporated and institutionalized into the County's response management model as illustrated through-out the policies and procedures of the County's response agencies.

CATEGORIES of HURRICANES

Category I

Winds of 74 to 95 miles per hour - Storm Surge 4-5 ft.

Damage will occur primarily to shrubbery, trees, unanchored mobile homes, and to poorly constructed signs. Low-lying coastal roads may be inundated, minor pier damage will occur, and some small craft in exposed anchorage may be torn from moorings.

Category II

Winds of 96 to 110 miles per hour - Storm Surge 6-8 ft.

Shrubbery and trees will sustain considerable damage, and major damage to exposed mobile homes will occur. Extensive damage to poorly constructed signs is to be expected and some damage to roofing materials, windows and doors. However, no damage to buildings is expected. Coastal roads and low-lying escape routes inland may be cut off by rising water two to four hours before arrival of the eye of the hurricane. There will be considerable damage to piers; marinas will be flooded and small craft in unprotected anchorages torn from moorings.

Category III

Winds of 111 to 130 miles per hour - Storm Surge 9-12 ft.

Large trees will sustain extensive damage and poorly constructed signs will be blown down. Damage to roofs, windows and doors can be expected and mobile homes will be destroyed. There will be extensive flooding along coasts and battering waves and floating debris will destroy many smaller coastal structures and damage large structures. Low-lying escape routes further inland may be inundated by rising water three to five hours before the eye of the hurricane arrives.

Category IV

Winds of 131 to 155 miles per hour - Storm Surge 13-18 ft.

Shrubs, trees and signs will be blown down. Roofs, windows and doors will sustain extensive damage and there will be complete failure of roofs on some small residences and destruction of mobile homes. Major damage to ground floors of structures near the shores due to flooding, battering waves and floating debris will also occur. Rising water may cut off low-lying inland evacuation and escape routes three to five hours before the eye of the hurricane arrives. Major beach erosion will also occur.

Category V

Winds greater than 155 miles per hour - Storm Surge 18+ ft.

Shrubs and trees will be blown down and there will be considerable damage to roofs of buildings, all signs will be blown down, windows and doors will sustain severe damages. There will also be complete failure of roofs on many residential and industrial buildings and extensive shattering of glass in windows and doors. Some complete buildings will be destroyed, smaller buildings overturned or blown away, and complete destruction of mobile homes will occur. Low-lying escape routes inland may be cut off by rising water three to five hours before the hurricane center arrives.

Miami-Dade County is vulnerable to hurricanes and the devastating impacts that could result. In case the County is threatened by a hurricane it is important to monitor all advisories and warnings. The following terms and definitions will allow employees to understand the dangers and to act accordingly

DEFINITIONS

Advisory

A national Weather Service message giving storm location, intensity, movement, and precautions to be taken.

Eye

The roughly circular area of comparatively light winds and calm weather at the center of a hurricane. Hurricane eyes are usually 25-30 miles in diameter. The area around the eye is called the wall cloud. Residents should not go outdoors while the eye is passing as the full intensity of the storm could reoccur in minutes.

Hurricane

A tropical weather system characterized by pronounced rotary circulation with a constant minimum wind speed of 74 miles per hour (64 knots) or greater that is usually accompanied by rain, thunder and lightning. Hurricanes often spawn tornadoes.

Hurricane Season

The Atlantic Hurricane season is the six-month period from June 1st through November 30th each year.

Hurricane Alert

The County Manager will issue a hurricane alert if readiness actions are required before a hurricane watch is issued. Actions normally taken during a hurricane watch should be initiated when a hurricane alert is declared.

Hurricane Watch

Issued by the National Hurricane Center when a hurricane threatens, a hurricane watch covers a specified area and time period. A hurricane watch indicates hurricane conditions are possible, usually within 24-36 hours. When a watch is issued, employees should listen for advisories and be prepared to take action if advised to do so.

Hurricane Warning

A warning is issued by the National Hurricane Center 24 hours before hurricane conditions (winds greater than 74 mph) are expected. If the hurricane path changes quickly, the warning may be issued 10 to 18 hours or less, before the storm makes landfall. A warning will also identify where dangerously high water and waves are forecasted even though winds may be less than hurricane force.

Hurricane Eye Landfall

This indicates the location and time that the eye of the hurricane passes over the shoreline. After passage of the eye, hurricane force winds will begin again with the same intensity as prior to the arrival of the eye, but winds will be from the opposite direction.

Storm Surge

A dome of water, often 50 miles across, that sweeps across the coastline inundating the land with water levels above normal high tide. Water levels rise as a hurricane approaches, peaking where the eye makes landfall, and gradually subsides after the hurricane passes. Storm surges, also known as tidal flooding, have been responsible for nine of every ten hurricane related deaths recorded.

Tropical Storm

A tropical storm is an area of low pressure with a definable eye and counter-clockwise winds of 39-73 mph. A tropical storm may strengthen to hurricane force within a short period of time.

Tropical Storm Warning

These are warnings issued by the National Hurricane Center when storm winds of 55-73 miles per hour are expected. If a hurricane is expected to strike separate tropical storm warnings will not usually precede hurricane warnings.

Tornado Watch/Warning

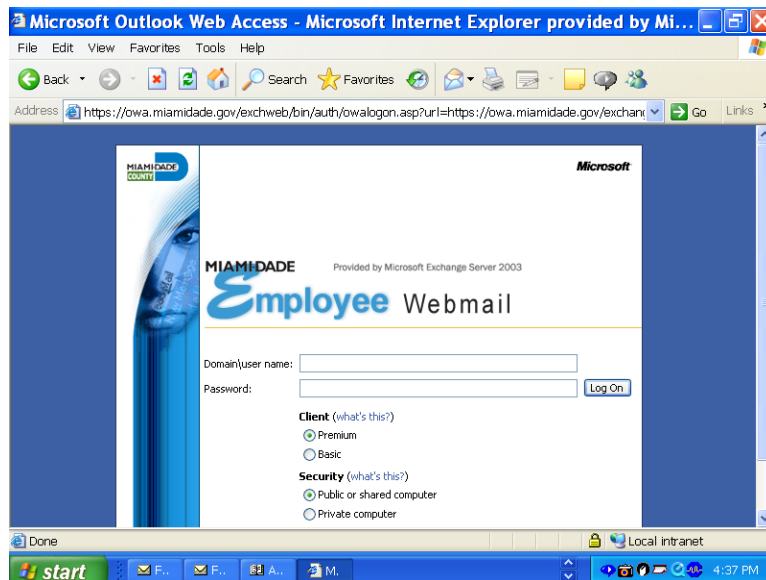

Issued by the National Weather Services, a "watch" means conditions are favorable for tornado development and a "warning" indicates one or more tornadoes have touched down.

MAPS AND DIRECTIONS TO
EMERGENCY OPERATIONS HEADQUARTERS (EOC)
From SPCC (111NW 1st Street)

Directions	Distance
Total Est. Time: 18 minutes Total Est. Distance: 12.67 miles
